**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am glad companies, such as Sonic.net exist. Their fiber to my home is way more stable, cheaper and better than Comcast, AT&T, or Wave. I was using DSL/cable previously and had to pay over \$60 for 20megs. I would have to pay over \$150 to get the speeds I currently get. This is a country that thrives on competition and, this company, gives those big monoliths a run for their money. They should also play fair and allow others access since they seem to control central offices and access points. I also don't think we should have to pay more for less. As I said before, their solutions, even their fiber, are way more expensive so it doesn't make sense to pay more for less, right?

Please add my name to the list asking for "Bridge 2 Broadband" for small companies needing the incumbents to allow them access.

Thank you.
